

Exhibit A – Historic Development Analysis

Agenda Item XI
WCCA
7/20/11

NOTE: “Areas Developed 1964-1981” were derived from areas noted as new development on the USGS topography quadrangle maps which were originally produced in 1964 and then photorevised in 1981 to show newly-developed areas. “Areas Developed 1981-Present” were derived by comparing current aerial photography to the developed areas on the USGS maps. Developed areas shown are those that are, or were, contiguous at one time with currently undeveloped land located with the Habitat Authority’s Jurisdictional Boundary.
