MISSION STATEMENT

Through direct action, alliances, partnerships, and joint powers authorities, the Conservancy's mission is to strategically buy back, preserve, protect, restore, and enhance treasured pieces of Southern California to form an interlinking system of urban, rural and river parks, open space, trails, and wildlife habitats that are easily accessible to the general public.

INTRODUCTION

The Santa Monica Mountains Conservancy was established in 1980 following the passage of the Santa Monica Mountains Conservancy Act. This landmark legislation, amended five times since then to bring more of the Southern California mountains within the Conservancy's jurisdiction, has resulted in the preservation of over 72,000 acres of parkland, the improvement of more than 100 public recreational facilities, and numerous individual grants to nonprofit organizations for educational and interpretation programs that have served hundreds of thousands of children, seniors, and other park visitors.

The Conservancy consists of nine voting members, two ex-officio members and six legislative members. This policy-making entity for the Conservancy is broadly representative of state, regional, and local interests. A twenty-six member Advisory Committee meets jointly with the Conservancy and offers citizens the opportunity for even greater participation. The composition of both the Conservancy and the Advisory Committee has greatly expanded since its inception.

The key to the Conservancy's success has been partnerships—cooperating landowners, local governments, joint powers entities, California State Parks and the National Park Service—all have contributed to the articulation of a greater vision for parks, open space, and natural habitat surrounding the Southern California metropolis.

This report will detail the financial activities of the Santa Monica Mountains Conservancy for fiscal year 2014-2015.

STRATEGIC OBJECTIVES

The Conservancy's strategic objectives continue to be guided by the goal of an interlinking network of parks, trails, and open space for public use and wildlife habitat, ensuring future open space and recreational lands in Los Angeles and Ventura Counties. The goals and objectives were initially set in the Santa Monica Mountains Comprehensive Plan and the Rim of the Valley Trail Corridor Master Plan. They have been updated through a strategic planning process which included substantial public input.

Implement the Santa Monica Mountains Comprehensive Plan

- Complete fee and less than fee acquisition program
- Cooperate with National Park Service (NPS) and State Parks in implementing the Joint Efficiencies MOU
- Cooperate with NPS management plan for Santa Monica Mountains National Recreation Area (SMMNRA) and Santa Monica Mountains Zones
- Continue to maximize acquisition dollars by leveraging funds where appropriate

Implement the Rim of the Valley Trails Corridor Master Plan

- Complete land acquisition recommendations of the Plan
- Complete trails and trail amenities recommended by the Plan
- Cooperate with private sector in providing recreational opportunities
- Continue to maximize acquisition dollars by leveraging funds where appropriate

Implement the Los Angeles County River Master Plan

- Create 51 miles of continuous river parkway and greenbelt
- Develop recreation, park, trail and habitat restoration opportunities
- Increase community involvement
- Cooperate with local government and non-profit partners and maximize acquisition Dollars by leveraging funds where appropriate

Implement the San Gabriel and Los Angeles Rivers Watershed and Open Space Plan

- Restore balance between natural and human systems in the watersheds
- Land: Create, expand, and improve public open space and recreation for all communities, connect open space with a network of trails
- Water: Maintain and improve flood protection, establish riverfront greenways to cleanse water; improve quality of surface water and ground water
- Planning: Coordinate watershed planning across jurisdictions and boundaries, encourage multi-objective planning and projects, use science as a basis for planning

Further Cooperation with Local Governments in the Region to Secure Open Space and Parkland

- Strengthen partnership agreements with local governments and establish new joint powers entities throughout the region where appropriate
- Ensure that Conservancy land acquisition expertise is made available where needed
- Reduce State work load by utilizing local agency agreements and state and local partnerships wherever possible
- Develop comprehensive plan for areas not covered by initial Conservancy Comprehensive Plan and incorporate and link those areas to protect species and ecosystems

Expand efforts to integrate nature into the urban environment

- Acquire or create parkland in urban areas that lack open space or natural parks
- Link and integrate new natural parks into existing park system—literally via transportation and physical linkages, thematically via programs and events
- Develop joint powers authorities with local government entities and urban interests
- Maximize funding opportunities through partnerships

Expand education, public access, and resource stewardship components in a manner that best serves the public, protects habitat, and provides recreational opportunities

- Expand local government, school district, and nonprofit ventures to provide increased educational and access opportunities
- Link key habitat areas strategically to protect species and ecosystems through acquisition and cooperation with other resource management agencies
- Increase resource stewardship and educational/interpretative capabilities within the Zone
- Create comprehensive, regional, and integrated trails plan
- Develop long term capital improvement and maintenance plans

ENCUMBERING STATE FUNDS CERTIFICATION INTEREST COSTS

The Budget Act requires the Conservancy to make three certifications before encumbering state appropriated funds for the purchase or acquisition of real property that requires the payment of interest costs, late fees or penalties. These certifications are needed whether or not the encumbrance is direct or through a public agency intermediary, including the State Public Works Board.

The certifications are:

1. That the purchase is necessary to implement an acquisition identified in the high priority category of the work program submitted annually to the Legislature pursuant to Section 33208 of the Public Resources Code, or amendments made thereto; and
2. That the purchase agreement does not involve interest payments or terms in excess of those that the State Public Works Board may enter into pursuant to Section 15854.I of the Government Code; and
3. That the purchase agreement does not commit the state to future appropriations.

The budget language also includes a reporting requirement should the Conservancy choose to encumber funds as described above. The language requires the Conservancy to report to the Legislature no less frequently than twice yearly, concerning the status of any purchases certified and the amount of state funds thus far encumbered for interest, penalties, or other principal surcharges.

During fiscal year 2014-2015, the Conservancy did not encumber any state appropriated funds for the purchase or acquisition of real property directly or through any public agency intermediary that requires the payment of interest costs, or late fees or penalties.

WORKPROGRAM PRIORITIES

Since the Conservancy adopted its Land Acquisition Workprogram and its Improvement and Development Project Workprogram in 2000 and 2001, respectively, the evaluation criteria for both documents have been emulated and lauded within the State Natural Resources Agency. These criteria demonstrate a viable means of quantifying a diverse set of project attributes to produce a priority ranking list. This list has served the Conservancy well in its allocation of State bond funds approved by the voters including Propositions 12, 13, 40, 50, and 84. Of the top 25 ranked acquisition projects determined in 2000, the Conservancy, State Parks, and other agencies have acquired or permanently protected 14 of these projects in their entirety, and six additional projects in part, bringing more than 14,000 acres into public ownership. One more of the top 25 projects, the Dayton Canyon dedication in the Simi Hills, is protected through the California Environmental Quality Act process but no interest in land has yet to be transferred to a public agency.

Workprogram projects are grouped by the following planning areas that are depicted on the following maps. These maps provide the name and location every project on the Acquisition Workprogram.

Workprogram projects are grouped by planning area:

- River / Urban
- Simi Hills
- Western Rim of the Valley — WROV
- Eastern Rim of the Valley — EROV
- Western Santa Monica Mountains — WSMM
- Eastern Santa Monica Mountains — ESMM

GOVERNMENT ACTIONS REVIEW

Plan Approval

The Secretary of the Interior approved the Santa Monica Mountains Comprehensive Plan on November 10, 1979, thereby making the Conservancy and local governments within the Santa Monica Mountains Zone eligible for the authorized five-year, \$30 million federal grant program provided for in Section 507(n) of the National Parks and Recreation Act of 1978. The grant eligibility period ended in 1985 without the Department of the Interior awarding any grants. While no grants were awarded, Section 507 provided an alternative method of transferring federal money to state and local governments by authorizing reimbursements for land purchased after establishment of the recreation area. This cooperative funding mechanism has resulted in over \$34 million being spent for high priority acquisitions in the Santa Monica Mountains National Recreation Area.

Federal Report

The Santa Monica Mountains National Recreation (SMMNRA), a unit of the National Park System, continues to provide federal support to the mission of Santa Monica Mountains Conservancy in the form of cooperative management resources and land acquisition funding in the Santa Monica Mountains. A Cooperative Management Agreement was signed by the National Park Service, California Department of Parks and Recreation, Santa Monica Mountains Conservancy and Mountains Recreation and Conservation Authority in 2013 that authorizes the exchange of goods and services to accomplish cooperative management and enhancement of local, state, and federal parklands. The value of efficiencies gained through cooperation under the agreement is approximately \$800,000. These savings are retained by the cooperating agencies and reinvested into core operational requirements and key public services.

In June 2012, the Anthony C. Beilenson Interagency Visitor Center was opened at King Gillette Ranch in the historic heart of the Santa Monica Mountains. The federal American Reinvestment and Recovery Act provided \$9.5 million in funding for the construction of the visitor center, which was named for the former congressman who in 1978 introduced legislation to create the SMMNRA. The first LEEDs Platinum visitor center in the National Park Service system, it is jointly managed by the National Park Service, California State Parks, Santa Monica Mountains Conservancy, and the Mountains Recreation and Conservation Authority.

Some of the other resources the National Park Service has committed for parkland management purposes in the Santa Monica Mountains in the last three years include:

- \$1.97 million to acquire inholdings in Zuma/Trancas Canyon. The funds are partially expended after acquiring a 70-acre Zuma Canyon ridgeline inholding in 2014 and a six-acre inholding in 2013.
- \$233,000 in a task agreement with MRCA for preparing the forthcoming interagency SMMNRA Trail Management Plan from the 2005 SAFETEA-LU transportation bill. Public meetings were held. The final plan is expected in the summer of 2015.
- \$465,000 for acquisition of private lands to bridge the two final private property gaps along the 67-mile Backbone Trail, using grant funding from Los Angeles County's Third Supervisorial District's Natural Land for Trails program. Acquisition efforts are underway.
- \$220,000 for operation of the William O Douglas Outdoor Classroom at Franklin Canyon, and for other environmental education purposes.

Bonded Indebtedness

The Santa Monica Mountains Conservancy Act requires a "listing" of the amount of money necessary to retire bonded indebtedness already incurred which would contribute to further development in the mountains inconsistent with the Comprehensive Plan. The origin of this requirement is Section 507(n) of the National Parks and Recreation Act of 1978 which permits the Secretary of the Interior to grant federal funds to retire indebtedness found to contribute to inappropriate development.

To date, no municipal water or utility district has indicated any willingness to apply for such a "buy out" grant. Nor is it apparent that bonded indebtedness per se is acting as an inducement for more development. During administrative consideration of the 1980-81 Governor's budget, the Conservancy proposed undertaking a study of the need for utility "buy out" grants. That budget proposal was not approved and no study has been conducted.

LOCAL AGENCY COMPLIANCE

When the Santa Mountains Comprehensive Plan was adopted by the State Legislature in 1979, it set a new standard for land protection policies and guidelines in Southern California. A report on the local government signatories to the Santa Monica Mountains Comprehensive Plan is made annually, with respect to those local agencies' actions to implement the Plan. In recognition of the Plan's importance and value, the City and County of Los Angeles, the City of Thousand Oaks, and the County of Ventura adopted resolutions that year containing commitments to implement the Plan. Compliance of each of these jurisdictions in the last year is addressed below.

City of Thousand Oaks

The City of Thousand Oaks' strong record of adherence to the Comprehensive Plan continued throughout 2014-2015. The City continues to maximize its acquisition of open space and to minimize the footprint of deleterious development projects. The Conejo Open Space Conservation Agency, the joint powers agency formed by the City and the Conejo Recreation and Park District, also continues to manage thousands of acres of open space in a manner consistent with the Plan.

County of Los Angeles

Over the last year, Los Angeles County's level of compliance with the Comprehensive Plan has been exceptional. The Regional Planning staff increasingly understands and anticipates the planning principles represented in the Plan. The County staff increasingly works to require mitigation measures suggested in Conservancy comment letters.

County of Ventura

Regulatory actions regarding land use within unincorporated Ventura County are generally consistent with the Comprehensive Plan and with the resolution adopted by the Ventura County Board of Supervisors in 1979. Prior years' concerns have lessened somewhat regarding incremental single family residential development in the upper reaches of the Little Sycamore Canyon and Arroyo Sequit watersheds, adjacent to Point Mugu State Park, since the pace of land divisions has been reduced. However, this regionally significant watershed is still an area of concern; the County's project review must better address cumulative visual impacts and biological fragmentation as well as overdraft of groundwater supply. The County has advanced significantly in requiring open space deed restrictions.

City of Los Angeles

The City of Los Angeles' compliance with the Comprehensive Plan has been fair. The City planning staff continues to resist efforts to maintain habitat linkages with permanent protection mechanisms. That deficiency occurs both within and outside the

Mulholland Scenic Parkway Specific Plan area. The Plan provides for maximizing the protection of scenic resources within the Mulholland scenic corridor. The City's environmental review process must better consider wildlife movement corridors and general habitat connectivity in its environmental analyses to be consistent with the Plan. Most Mitigated Negative Declarations include no such analysis or even recognition of site-specific habitat connectivity issues.

City of Agoura Hills

Although not an original signatory to the Santa Monica Mountains Comprehensive Plan, which predated the City's incorporation, the City of Agoura Hills conducted high quality environmental reviews. However, recent City development approvals and plans have moved a notch away from prior unparalleled regard for major permanent habitat and viewshed protections.

City of Calabasas

Although not an original signatory to the Santa Monica Mountains Comprehensive Plan which predated the City's incorporation, the City of Calabasas has continued to reverse course and move in a land use direction antithetical to the Plan. That movement is now all-encompassing.

City of Westlake Village

Although not an original signatory to the Santa Monica Mountains Comprehensive Plan which predated the City's incorporation, the City of Westlake Village this year has only approved infill projects with de *minimis* impacts. The City's continued but stalled interest in extra-territorial trail linkages is welcomed.

City of Malibu

Although not an original signatory to the Santa Monica Mountains Comprehensive Plan which predated the City's incorporation, the City of Malibu is just partially in compliance with the Comprehensive Plan because of uncommon and usually unsuccessful efforts to obtain public trail or open space easements or restrictions. The Malibu Local Coastal Plan is a good guide for the City's development.

1. Funds revert to fund of origin (SMMC Fund) and were available for expenditure under Item 3810-301-941, Ch. 324/83
2. This figure represents "spending authority"; however, the actual cash balance in the Conservancy Fund was \$496,255 which was available for expenditure from the spending authority appropriated in Item 3810-301-941, Ch. 258/84.
3. A \$1,000,000 abatement from the Lake Sherwood project makes the actual expenditures for this item total more than the appropriation.
4. This is the unencumbered spending authority; however, the Conservancy Fund cash balance was \$291,868, and was subsequently expended for the Conservancy's FY 87-88 support reimbursement.
5. Funds reverted no longer available for expenditure from this appropriation. Available for future appropriations.

PROJECT ACTIVITY AND COMPREHENSIVE PLAN CERTIFICATION

Section 33208(a)(1) of the Public Resources Code provides that the annual report shall include a listing of, and justification for, the projects to be undertaken pursuant to Section 33204, a statement of the condition of the fund, and a certification that each of the projects proposed to be funded are consistent with the plan.

As part of the resolution authorizing action on each project undertaken by the Conservancy, a certification is made that it is consistent with the Comprehensive Plan as provided in Section 33208(a)(1).

The following are project reports, including information on grants for the Santa Monica Mountains Conservancy for fiscal year 2014-2015.

IV. NARRATIVE

This project will fund efforts to contract with Caltrans and other contractors to produce a Project Study Report (PSR) for a dedicated Liberty Canyon freeway wildlife crossing structure. The MRCA's first step is to enter into a cooperative agreement with Caltrans that defines the scope and payment arrangements for the PSR. The MRCA may also use a small portion of the funding up front to produce preferred design concepts for Caltrans to evaluate. The budget is tight with minimal opportunity to change course. If course changes are necessary, the possibility is open that the Santa Monica Mountains National Recreation Area may contribute financially to the project via a Task Agreement with the MRCA.

Project planning and design of Greenway 2020, an aggressive initiative to fill in the gaps so the Los Angeles River Greenway would run continuously from San Fernando Valley to Long Beach, complete with amenities along the way. The Greenway will also create greater access and linkages to State resources and investments like the State Historic Park, Rio de Los Angeles Park, and Marsh Park. The focus of this grant funding will be to study how to best complete as much of the missing trail segments as possible, as well as to create public amenities and enhancement of the Greenway. This type of strategic overview is needed to ensure that the next generation of river projects addresses the current status of the river.

IV. NARRATIVE

The proposed project is to construct a bicycle and pedestrian trail along the Arroyo Seco in South Pasadena. This trail will permit access through the City's Golf Driving Range to open a path closed for nearly 60 years. Conservancy funding will consist of the planting of drought tolerant and native plants and trees to help provide shade for trail users as well as to help restore the natural watershed area along the river channel. Drip, bubble and other irrigation will be installed to establish the trees and plants. The trail area will be graded and non-native or diseased trees removed. Mulch added to the plants and a short term maintenance plan for plant and tree acclimation is planned. A pedestrian access gate will be constructed to permit trail use when the golf course is closed.

IV. NARRATIVE

Project planning, design, engineering, and community outreach for the Pacoima Wash Greenway, El Dorado Park. The project will develop wildlife habitat and create new public access to the planned greenway along the Pacoima Wash by converting an approximately 1.2 acre vacant parcel into a natural open space. New recreation, education and water-quality improvements include landscaped walking and fitness trails, free-play meadows, an education station, stormwater treatment, and picnic and community gathering spaces. The site is a linear parcel in the San Fernando Valley community of Pacoima adjacent to Pacoima Wash, which connects ecologically significant habitat in the San Gabriel Mountains as well.

IV. NARRATIVE

Project planning and design of the Glenoaks Greenway project. Located in the community of Sun Valley, the Glenoaks Greenway is the conversion of a linear strip of land adjacent to the Burbank West Channel waterway into a pedestrian trail and water quality Best Management Practice (BMP). Storm water from a densely populated urban area currently flows untreated into the Burbank West channel, and then flows downstream into the upper Los Angeles River and out to the ocean. The Glenoaks Greenway site is an opportunity to treat and infiltrate the storm water before it enters the concrete flood control system.
